

Brazilian Broadcasters Opt For Omnia Audio Processors

23 December 2002, Cleveland Ohio, USA

Three new Omnia Digital Audio Processors are in use by broadcasters in Brazil, sold through Omnia representative Broadcast Richardson Brazil.

Sompur São Paulo Radiodifusao, located in São Paulo, South America's most populous city, has chosen Omnia-6fm; medium-wave broadcaster Radio Difusora de Colatina has purchased an Omnia-4.5am, and Radio Jornal Cidade de Bauru has taken delivery of an Omnia-3fm.

"We're seeing an explosion of growth," says Telos Systems President Frank Foti. "More and more broadcasters in Latin America are finding out about, and upgrading to, Omnia."

Other prominent Brazilian broadcasters processing with Omnia include São Paulo's Radio Nativa, Radio Cidade de São Paulo and Rádio 89-FM, and Rio de Janeiro's Rádio JB-FM.
